Plant Science, 86 (1992) 225–226
Elsevier Scientific Publishers Ireland Ltd.

Subject Index

Volume 86 (1992)

ABA responsive genes, LEA proteins, RAB proteins, water stress, wheat roots, 71
Adduct, DNA, plant, xenobiotic, 13
Affinity chromatography, callose synthase, fast protein liquid chromatography, plasma membrane, celery, 125
Algae, *Chara*, K^+ channel, patch-clamp, tonoplast, 49
Allium cepa L., onion, gynogenesis, haploids, 97
Anther, *Hordeum vulgare* L., microspore, development of microspores, anther pretreatment, glutamine, 89
Anther pretreatment, *Hordeum vulgare* L., anther, microspore, development of microspores, glutamine, 89
Apoplastic water, *Triticum* sp., cell wall elasticity, osmotic adjustment, water stress, 1
Auxin, boron, proton extrusion, plasma membrane ATPase, redox activity, light, sunflower cell cultures, 41
Auxins extracellular glycoproteins, *Vitis vinifera*, 137

Biological control, phytotoxins, synergism, pathogen, plant disease, 155
Boron, proton extrusion, plasma membrane ATPase, redox activity, auxin, light, sunflower cell cultures, 41
Brassica napus cv. Westar, cytoplasmic male sterility, endogenous cytokinins, 147
Bud formation, cytokinin, hairy root, horseradish, light, 161

Ca^{2+} transport, *Euglena gracilis*, mitochondria, respiration, membrane potential, 21
Callose synthase, fast protein liquid chromatography, affinity chromatography, plasma membrane, celery, 125
Capsicum annuum, pepper, invertase, sucrose-phosphate synthase, sucrose synthase, sugar accumulation, 33
Celery, callose synthase, fast protein liquid chromatography, affinity chromatography, plasma membrane, 125
Cell wall elasticity, *Triticum* sp., apoplastic water, osmotic adjustment, water stress, 1
Chara, K^+ channel, patch-clamp, tonoplast, algae, 49
Coriander, seed development, oleosin, storage protein, 59
Cotyledon culture *Helianthus annuus*, shoot organogenesis, ethylene, 215
Cytogenetics, *Lycopersicon*, *Solanum*, protoplast fusion, somatic hybrids, morphology, isozymes, 203
Cytokinin, bud formation, hairy root, horseradish, light, 161
Cytoplasmic male sterility, *Brassica napus* cv. Westar, endogenous cytokinins, 147

Development of microspores, *Hordeum vulgare* L., anther, microspore, anther pretreatment, glutamine, 89
DNA, adduct, plant, xenobiotic, 13

Electroporation *Oryza sativa*, neomycin phosphotransferase, protoplasts, transformation, 191
Endogenous cytokinins *Brassica napus* cv. Westar, cytoplasmic male sterility, 147
Ethylene, *Helianthus annuus*, shoot organogenesis, cotyledon culture, 215
Euglena gracilis, mitochondria, respiration, membrane potential, Ca^{2+} transport, 21
Extracellular glycoproteins, *Vitis vinifera*, auxins, 137

Fast protein liquid chromatography, callose synthase, affinity chromatography, plasma membrane, celery, 125

Glutamine, *Hordeum vulgare* L., anther, microspore, development of microspores, anther pretreatment, 89
Gynogenesis, onion, *Allium cepa* L., haploids, 97

Hairy root, bud formation, cytokinin, horseradish, light, 161
Haploids, onion, *Allium cepa* L., gynogenesis, 97
Helianthus annuus, shoot organogenesis, ethylene, cotyledon culture, 215
Hordeum vulgare L., anther, microspore, development of microspores, anther pretreatment, glutamine, 89
Horseradish, bud formation, cytokinin, hairy root, light, 161

Imidodiphosphate, pyrophosphate:fructose 6-phosphate phosphotransferase, potato tuber, *Solanum tuberosum*, 183
Immature embryos, rice (*Oryza sativa* L.), primary calli, protoplast culture, plant regeneration, 83
Invertase, *Capsicum annuum*, pepper, sucrose-phosphate synthase, sucrose synthase, sugar accumulation, 33
Isozymes, *Lycopersicon*, *Solanum*, protoplast fusion, somatic hybrids, morphology, cytogenetics, 203

K^+ channel, *Chara*, patch-clamp, tonoplast, algae, 49

LEA proteins, ABA responsive genes, RAB proteins, water stress, wheat roots, 71
Leaf optics, structural photosynthesis, light acclimation, light gradients, 167
Light, boron, proton extrusion, plasma membrane ATPase, redox activity, auxin, sunflower cell cultures, 41
Light acclimation, structural photosynthesis, leaf optics, light gradients, 167
Light bud formation, cytokinin, hairy root, horseradish, 161
Light gradients, structural photosynthesis, light acclimation, leaf optics, 167
Lilium, meiosis, microsporocytes, synaptonemal complex, 115

Lycopersicon, *Solanum*, protoplast fusion, somatic hybrids, morphology, isozymes, cytogenetics, 203

Meiosis, microsporocytes, *Lilium*, synaptonemal complex, 115
Membrane potential, *Euglena gracilis*, mitochondria, respiration, Ca^{2+} transport, 21
Microspore, *Hordeum vulgare* L., anther, development of microspores, anther pretreatment, glutamine, 89
Microsporocytes, meiosis, *Lilium*, synaptonemal complex, 115
Mitochondria, *Euglena gracilis*, respiration, membrane potential, Ca^{2+} transport, 21
Morphology, *Lycopersicon*, *Solanum*, protoplast fusion, somatic hybrids, isozymes, cytogenetics, 203

Neomycin phosphotransferase, *Oryza sativa*, protoplasts, transformation, electroporation, 191
Nurse culture, protoplast, *Raphanus sativus*, 105

Oleosin, coriander, seed development, storage protein, 59
Onion, *Allium cepa* L., gynogenesis, haploids, 97
Oryza sativa, neomycin phosphotransferase, protoplasts, transformation, electroporation, 191
Osmotic adjustment, *Triticum* sp., apoplastic water, cell wall elasticity, water stress, 1

Patch-clamp, *Chara*, K^+ channel, tonoplast, algae, 49
Pathogen, phytotoxins, biological control, synergism, plant disease, 155
Pepper, *Capsicum annuum*, invertase, sucrose-phosphate synthase, sucrose synthase, sugar accumulation, 33
Phytotoxins, biological control, synergism, pathogen, plant disease, 155
Plant, adduct, DNA, xenobiotic, 13
Plant disease, phytotoxins, biological control, synergism, pathogen, 155
Plant regeneration, rice (*Oryza sativa* L.), immature embryos, primary calli, protoplast culture, 83
Plasma membrane, callose synthase, fast protein liquid chromatography, affinity chromatography, celery, 125
Plasma membrane ATPase, boron, proton extrusion, redox activity, auxin, light, sunflower cell cultures, 41
Potato tuber, pyrophosphate:fructose 6-phosphate phosphotransferase, imidodiphosphate, *Solanum tuberosum*, 183
Primary calli, rice (*Oryza sativa* L.), immature embryos, protoplast culture, plant regeneration, 83
Proton extrusion, boron, plasma membrane ATPase, redox activity, auxin, light, sunflower cell cultures, 41
Protoplast, nurse culture, *Raphanus sativus*, 105
Protoplast culture, rice (*Oryza sativa* L.), immature embryos, primary calli, plant regeneration, 83
Protoplast fusion, *Lycopersicon*, *Solanum*, somatic hybrids, morphology, isozymes, cytogenetics, 203
Protoplasts, *Oryza sativa*, neomycin phosphotransferase, transformation, electroporation, 191

Pyrophosphate:fructose 6-phosphate phosphotransferase, imidodiphosphate, potato tuber, *Solanum tuberosum*, 183

RAB proteins, ABA responsive genes, LEA proteins, water stress, wheat roots, 71
Raphanus sativus, nurse culture, protoplast, 105
Redox activity, boron, proton extrusion, plasma membrane ATPase, auxin, light, sunflower cell cultures, 41
Respiration, *Euglena gracilis*, mitochondria, membrane potential, Ca^{2+} transport, 21
Rice (*Oryza sativa* L.), immature embryos, primary calli, protoplast culture, plant regeneration, 83

Seed development, coriander, oleosin, storage protein, 59
Shoot organogenesis, *Helianthus annuus*, ethylene, cotyledon culture, 215
Solanum, *Lycopersicon*, protoplast fusion, somatic hybrids, morphology, isozymes, cytogenetics, 203
Solanum tuberosum pyrophosphate:fructose 6-phosphate phosphotransferase, imidodiphosphate, potato tuber, 183
Somatic hybrids, *Lycopersicon*, *Solanum*, protoplast fusion, morphology, isozymes, cytogenetics, 203
Storage protein coriander, seed development, oleosin, 59
Structural photosynthesis, light acclimation, leaf optics, light gradients, 167
Sucrose synthase, *Capsicum annuum*, pepper, invertase, sucrose-phosphate synthase, sugar accumulation, 33
Sucrose-phosphate synthase, *Capsicum annuum*, pepper, invertase, sucrose synthase, sugar accumulation, 33
Sugar accumulation, *Capsicum annuum*, pepper, invertase, sucrose-phosphate synthase, sucrose synthase, 33
Sunflower cell cultures, boron, proton extrusion, plasma membrane ATPase, redox activity, auxin, light, 41
Synaptonemal complex, meiosis, microsporocytes, *Lilium*, 115
Synergism, phytotoxins, biological control, pathogen, plant disease, 155

Tonoplast, *Chara*, K^+ channel, patch-clamp, algae, 49
Transformation, *Oryza sativa*, neomycin phosphotransferase, protoplasts, electroporation, 191
Triticum sp., apoplastic water, cell wall elasticity, osmotic adjustment, water stress, 1

Vitis vinifera, extracellular glycoproteins, auxins, 137

Water stress, ABA responsive genes, LEA proteins, RAB proteins, wheat roots, 71
Water stress, *Triticum* sp., apoplastic water, cell wall elasticity, osmotic adjustment, 1
Wheat roots, ABA responsive genes, LEA proteins, RAB proteins, water stress, 71

Xenobiotic, adduct, DNA, plant, 13
